

KYB

KYB Auto Parts Catalog Sports of Street 2018

<http://www.kybweb.com/en>

How to Read the Catalog

■ Searching for New SR Special for Toyota Vitz

- 1) Check the model and year of the car for which you want to search.
- 2) Check the grade (grade, engine type, body style (sedan, wagon, etc.) and number of doors, etc.) and number of doors, etc. See below for the meanings of the numbers that are followed by parentheses () in regard to the grade.
- 3) Check the column of the desired shock absorber, and search for the part number.

Model Number Chart by Car Type

⚠ As for special features (i.e. lower ride height), if no relevant comment is provided, no such feature is provided.

MODEL/YEAR	Grade	Front Rear	NEW SR Special	Lowfer Sports	Extage	Real Sports Damper

99/1 ~		R	NSF2051	WSF2051		
NCP10	2 (RS), 4 (2NZFE (1.3L)), 7 (3Door, 5Door), 11 (FF),	F	NST5206RL	WST5206RL		MR-NCP13
00/6 ~		R	NSF2051	WSF2051		

● Mention of Electronically Controlled Shock Absorber

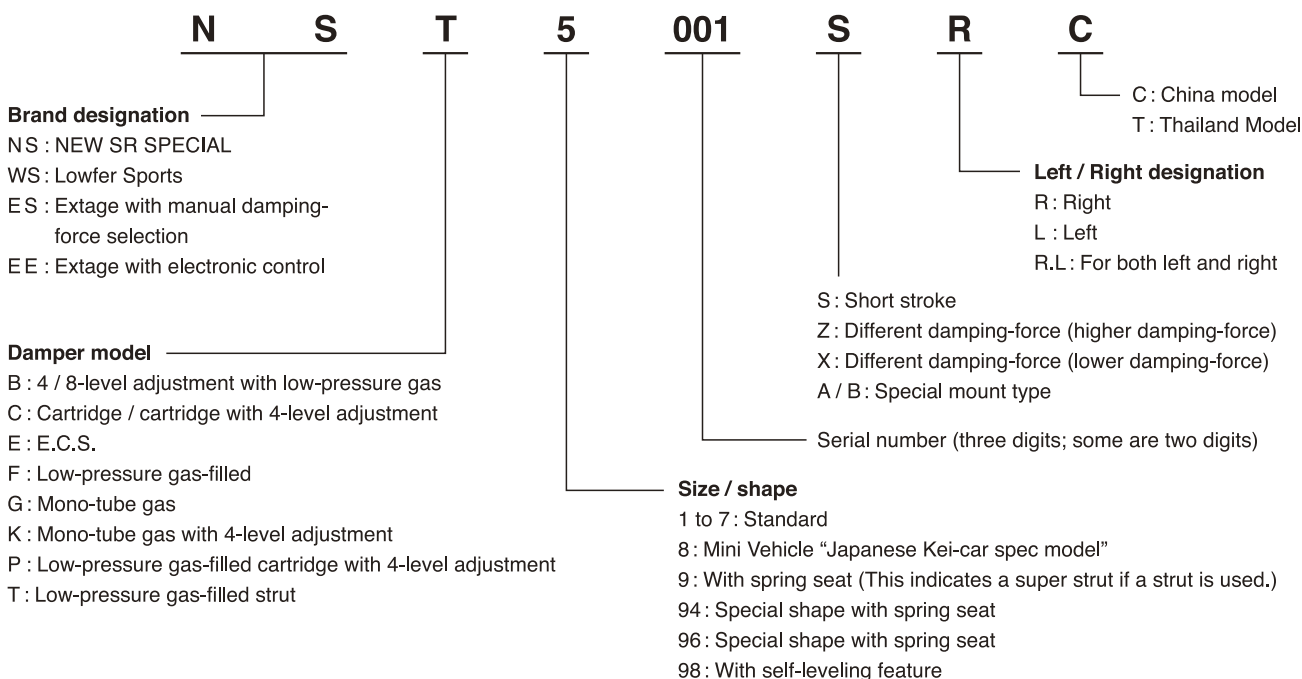

If the shock absorber has a special electronic control feature, it will be mentioned in the "Model" column. Please note that, if there is no mention of it in the column, the electronically controlled shock absorber is not used in the car.

- 1 (name), 2 (grade), 3 (engine type), 4 (engine model),
5 (exterior design), 6 (body style), 7 (door),
8 (passenger capacity), 9 (cargo capacity), 10 (tire),
11 (drive), 12 (note), 13 (area)

* For Vitz, it will be as follows: Grade (Classic), engine model (2NZFE), number of doors (3-door/5-door).

* Before replacing a cartridge, confirm whether the strut can be disassembled from the car in which it is installed. Please note that the cartridge cannot be installed in a car containing a strut that cannot be disassembled.

Outline of Model Number System

KYB responds to a broad range of car suspension needs with the advanced technologies only a manufacturer specializing in shock absorbers can provide.

The following concept applies to all KYB shock absorber products: "We strive to achieve ride comfort and driving stability" Our goal is to create products that can be used comfortably and with confidence when driving with family and friends.

<p>Standard</p> <p>NEW SR SPECIAL</p>  <p>Comfort</p>	<p>Lower Sports Suspension Kit system.</p> 	<p>Extage</p> 	<p>Premium</p> <p>REAL SPORTS DAMPER</p> 
--------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------

<p>NEW SR SPECIAL</p>	<p>Our basic high-performance shock absorber model. We strive to achieve a balance between comfort and a secure feel for daily commutes.</p>	
<p>Lower Sports Suspension Kit system.</p> <p>Lower Sports PLUS Suspension Kit system.</p> 	<p>Genuine shape short-stroke shock absorbers for lowrider style suspensions. They can also be installed as part a suspension kit with the L·H·S (L-KIT).</p> <p>Lower Sports L·H·S Low Rider Suspension</p> <p>A high quality coil spring designed to work best with the Lower Sports shock absorber. The ratio is set for a balance of low-rider style, drivability, and riding comfort.</p>	
<p>Extage</p>	<p>Our premium shock absorber, Extage offers a high quality and comfortable ride and solid handling. Damping force adjustments allow users to choose the optimal setting.</p>	<p>SUPER SPECIAL FOR STREET</p> <p>Four levels of front and rear damping force adjustments allow users to optimize controllability across a wide range of driving conditions.</p> 

<p>SPORT & COMPETITION</p>	<p>REAL SPORTS DAMPER</p> <p>Real Sports Damper Series</p> <p>Spec TR</p> <p>We developed this coilover kit series to shave hundredths of a second off your time on the course. We've reconfigured full-length type height adjustments for the Mitsubishi LANCER, Subaru IMPREZA and the Toyota 86 (Scion FR-S), as well as screw collar type height adjustments for compact cars.</p> <p>KCS</p> <p>The KCS series offers two types of springs; a Straight Formed Coil for setting up the RSD SpecTR (Real Sports Damper Series) and Genuine Formed Coil.</p> 	<p>GRAVEL</p> <p>Basic suspensions designed for gravel motorsports.</p> <p>Spec GR</p> <p>Allows adjustments for gravel; international rally standards suspension kit with a large reservoir tank and 3 way damping force adjustments.</p> 
---------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

NEW SR SPECIAL

Bored with of ordinary driving performance but don't want to settle for a harsh ride? KYB New SR SPECIAL is your choice!

Enhances basic aspects like accelerating, turning, and stopping for any car.

KYB suspension tuning experts perform full vehicle testing for New SR shock absorber installations to determine the optimal suspension characteristics for specific car models.

Characteristics of NewSR damping forces

- ① Strengthens rebound damping forces at slower speeds to improve response and handling.
- ② Increasing rebound damping forces by 5~10% ensures a smooth ride.
- ③ Absorbs the impact of bumps and seams above moderate speeds by adjusting the full volume of the damping force.

By reducing unwanted phenomena like roll, pitch, and nose diving, the New SR shocks are designed to achieve improved damping forces compared to your car's original suspension. Your car will demonstrate better handling response, greater stability while driving, and shorter braking distances. (This is because the shocks allow tires to function more effectively.)

Better handling

Improved cornering

Reduced braking distances

Additionally, the New SR shocks keep damping forces from becoming excessive for pleasurable, fatigue-free, long-distance driving.

The New SR has the same dimensions as your car's original shock absorbers, but offers greater durability than any other suspension type (including suspensions that offer height adjustments).

The New SR also provides the same stroke as your car's original suspension to expand your capacity to drive over irregular terrain. (Bump and rebound strokes are especially important when driving over irregular terrain.)

Pavement driving on uneven/unimproved roads

Lower Sports Suspension Kit system.

For Vehicles with lowered suspensions

Use shock absorbers specifically designed for cars with lowered springs!

Comfortable ride with Lower suspension.

Lower Sports Plus 14-Level Dial Easy Adjustments to Suit Your Driving Style

Comfortable ride with Lower suspension. Installing a lowering spring results in a lower ride height than with a standard spring. But installing a short-stroke shock absorber means the stroke will be nearly the same as the original shock absorber.

We've introduced a 14-level dial for the Lower Sports rear shock absorber to give you the ability to make superfine adjustments. The new dial lets you set the precise ride quality you want.

Lower Sports PLUS
Suspension Kit system.

Lowering Coil Spring for Optimal Combination

Lowering coil spring for optimal combination KYB also offers lowering springs designed specifically and confidently for Lower Sports to meet the needs of drivers who want to install the kind of lowering coil spring that will work best with the shock absorbers they've installed themselves for, optimal suspension performance.

KYB Extage

Make your car the smoothest on the road.

A combination of high performance tires and suspension tuning improves power and rigidity and achieves other advances in the overall performance of today's luxury cars. We developed as a premier brand designed exclusively for the next generation of luxury cars. Every car has its own personality, just as their owners do. With these drivers and cars in mind, we've poured all the latest advances in technology and craftsmanship into this product.

Treat your car to the best.

Extage does more than improve handling and create a smoother ride. It provides balance and a feeling of luxury, with tuning based on texture, to create the distinct sense that you're driving a better car.

A refusal to compromise is our baseline setting.

Circuit driving is all about handling and the balance between front and rear. At the KYB testing track, we make our final decisions only after a good smooth ride meets expectations on both the ordinary and high speed track.

Lowering coil spring for an optimal combination

Extage does more than improve handling and create a smoother ride. It provides balance and a feeling of luxury, with tuning based on texture, to create the distinct sense that you're driving a better car.

Multi-level (32 level) damping force adjustments to meet a wide range of driver needs

KYB has introduced a feature that lets drivers adjust damping forces to any of 32 levels (eight levels of adjustment with the rear shock absorber for certain models). The new feature lets drivers choose the optimal damping force based on the tires installed and the ride desired.

For 4X4 Lift Vehicles with HARMOFREQ

Used in shock absorbers, HARMOFREQ, a proprietary KYB technology, provides damping control by varying frequencies and differentiating between fine movements at high speeds that produce high frequencies and large movements at low speeds that produce low frequencies. Reducing vibrations and ensuring damping in the necessary areas helps achieve stability and a smoother and more comfortable ride. Vehicles incorporating HARMOFREQ achieve higher quality ride, with sensations that go beyond the one-dimensional axis of hard and soft.

LOWFER SPORTS KIT

LOWFER SPORTS Kit is a set of shock absorbers and special springs for one car.

*The amount of reduction in height from the original height is the actual measurement taken from a vehicle tested under the conditions set by KYB.

The amount of reduction may differ slightly, according to the specifications and/or individual characteristics of your car.

*The description of column 'Bumpstops' A=Use original bump stops B=Provided with shockabsorber C=Provided with Coils

*KIT P.No Attaching '★' is Rr 14 level Damping force Adjustment model.

Year	Model	LOWFER SPORTS-KIT KIT for one car	F/R	Parts No.	LHS Spring			Lower Sports Shockabsorber	Lower Sports + Shockabsorber Rr 14 level DF ADJ ★	Bump stops *

LOWFER SPORTS KIT

LOWFER SPORTS Kit is a set of shock absorbers and special springs for one car.

*The amount of reduction in height from the original height is the actual measurement taken from a vehicle tested under the conditions set by KYB.

The amount of reduction may differ slightly, according to the specifications and/or individual characteristics of your car.

*The description of column 'Bumpstops' A=Use original bump stops B=Provided with shockabsorber C=Provided with Coils

*KIT P.No Attaching '★' is Rr 14 level Damping force Adjustment model.

LOWFER SPORTS KIT

LOWFER SPORTS Kit is a set of shock absorbers and special springs for one car.

*The amount of reduction in height from the original height is the actual measurement taken from a vehicle tested under the conditions set by KYB.

The amount of reduction may differ slightly, according to the specifications and/or individual characteristics of your car.

*The description of column 'Bumpstops' A=Use original bump stops B=Provided with shockabsorber C=Provided with Coils

*KIT P.No Attaching '★' is Rr 14 level Damping force Adjustment model.

LOWFER SPORTS KIT

LOWFER SPORTS Kit is a set of shock absorbers and special springs for one car.

*The amount of reduction in height from the original height is the actual measurement taken from a vehicle tested under the conditions set by KYB.

The amount of reduction may differ slightly, according to the specifications and/or individual characteristics of your car.

*The description of column 'Bumpstops' A=Use original bump stops B=Provided with shockabsorber C=Provided with Coils

*KIT P.No Attaching '★' is Rr 14 level Damping force Adjustment model.

Year	Model	LOWFER SPORTS-KIT KIT for one car	F/R		LHS Spring			Lower Sports Shockabsorber	Lower Sports + Shockabsorber Rr 14 level DF ADJ ★	Bump stops *
			F	R	Parts No.	Amount of height reduction (mm)	Spring Rate N kg/mm			

SUBARU

■PLEO * [Note] In the grade RS (both 2WD and 4WD), the rear disc brake gets engaged when the vehicle height is lowered. This is because, due to how the wire is routed, the brake wire gets pulled as the vehicle is lowered.

It is recommended that full stroke of the parking brake be 'adjusted from the normal fifth notch to 10th or more notch'.

■TANTO/TANTO CUSTOM

[Note] When the shock absorber is stretched in the crawl speed range, the damping force of the front N/WST5306RL is slightly lower than that of the genuine shock absorber in the Custom RS. However, KYB conducted test drives and made sure that its shock absorber provides a mild ride.

MITSUBISHI

■ AIRTREK

That makes the turbo model an original setup that balances the following at a high level : the reduced impact from the road surface, improved steering response and corner damping.

MOCO

[Note 1]  Due to the delayed first year registration or other reasons, some vehicles may have a rear shock absorber with a different bottom shape even if the vehicles meet the compatibility requirements. Before placing an order, check the vehicle for the following :
The length of eye bush at the bottom mount of the rear shock absorber 32mm → #SF1042
The length of eye bush at the bottom mount of the rear shock absorber 60mm → NSF/WSF1042A

[Note 2] Spring seats of different heights are used in MG21S 04/2~04/12.
Use NST/WST5243R/L for vehicles with genuine part No. 54302-4A0A0.

■ SERENA

[C24 Series vehicles manufactured in October, '00] Because front struts of different shapes are used in vehicles of this model year, check the following and choose the compatible part number before installation.

Front right side 《Genuine part number》 54302-4N125 《Stamped part number》 54302-4N100 ⇒ Install NST5220R/NST5220L.

《Genuine part number》 54302-4N025/27/28/85/86 《Stamped part number》 54302-4N002/03/04/12/13 ⇒ Install NST5219R/NST5219L.

(To find a genuine part number, check the number stamped on the shock absorber or check the motor vehicle inspection certificate at the car dealer.)

X-TRAIL

[Vehicles manufactured in February, '12] Because front struts of different shapes are used in vehicles of this model year, check the following and choose the compatible part number before installation.

Front Right side(Genuine part number) E4302-3UB1A (Coined part number) 54302-3UB1A ⇒ Install NST5513R/L.

(Genuine part number) Other genuine part No. ⇒ Install NST5426R/L.

PLEO

[Note] In the grade RS (both 2WD and 4WD), the rear disc brake gets engaged when the vehicle height is lowered. This is because, due to how the wire is routed, the brake wire gets pulled as the vehicle is lowered.

It is recommended that full stroke of the parking brake be 'adjusted from the normal fifth notch to 10th or more notch'.

REAL SPORTS DAMPER

Whether you're looking to push your limits on a circuit or on the street, or looking for performance levels that meet your expectations on gravel, the KYB Real Sports Damper provides an authentic sports suspension.

For **Tarmac**

REAL SPORTS DAMPER Spec TR

Authentic sports suspension for street or circuit driving

Performance ↑

REAL SPORTS DAMPER GRAVEL

Basic suspension designed for gravel means you can enjoy off-roading whether you're a beginner or a licence-holder.

REAL SPORTS DAMPER Spec GR

Gravel suspension has all the specs you need to win dirt trials or other off-road races.

Tarmac ←

Gravel →

For **Gravel**

Real Sports Mind from KYB

RealSportsDamper TR was developed just for you to shave circuit times and let you dominate the course. You'll find the high performance 32-level adjustable mono-tube damper indispensable.

Spec TR
Full-Length type

Full-length height adjustments

You can set adjustable 32-level damping force mechanism to shave even more time from your personal bests. Due to the mono-tube structure, we can proudly and confidently claim incredible durability under virtually any conditions. This is the ultimate sports suspension designed for those seeking their best times ever.

DLC film treatment piston rod

Based on the ultra-thin Diamond-Like Carbon (DLC) carbon coating film treatment, the rods and ram cylinders used in the Spec TR series dramatically lower friction and increase hardness, wear resistance, and seizure resistance. The flexibility and compliance will give you the smoothest ride you've ever experienced.

Height adjustable shock absorber with a durable, reliable structure

A full-length structure and strengthened brackets give you the springs you've looked for so that you can drive your car at the height you want. An aluminum outer shell, high quality, and the incredible durability of the parts proudly stamped with the KYB seal of approval give peace of mind when you're pushing the envelope.

Compatible with the following:

MITSUBISHI

- LANCER Evo.5,6/CP9A
- LANCER Evo.7,8,9/CT9A
- LANCER Evo.10/CZ4A

SUBARU

- IMPREZA/GDB(A~D, E~G)
- IMPREZA/GRB

HONDA

- S2000/AP1
- CIVIC TypeR /EK9
- INTEGRA TypeR/DC2

Pre-load height adjustable type

Multi-level(4-32 level) damping-force adjustment DLC(Diamond-Like Carbon)film treatment piston rod Rear Genuine Form coil spring Short stroke spec for paved roads. (Rally tarmac & circuit)

Twin-tube configuration Mono tube configuration Mono tube(ram)configuration KYB competition springs

Compatible with the following:

TOYOTA

- Vitz RS/SCP10, NCP13
- Vitz RS/NCP91,131
- PRIUS/ZVW30
- 86/ZN6

SUBARU

- BRZ/ZC6

HONDA

- JAZZ/FIT RS/GE8, GK5
- CIVIC TypeR/FD2

SUZUKI

- SWIFT SPORTS/ZC31S
- SWIFT SPORTS/ZC32S

MAZDA

- Demio/DE5FS

Spec TR for Compact

Gravel Racing Spirit from KYB

This genuine form kit inherits the DNA of our ZR series. Offers a wide range of settings to leave your rivals in the dust, whether in a dirt trial or gravel rally.

Genuine Form height adjustments

Genuine form coilover kit for dirt-racing and rally use

Height adjustable shock absorber (Genuine form coil-over)

Twin-tube with reservoir tank

3-way damping force adjustments

rebound: 32 levels; compression: 16 levels (low speed), stepless (high speed)

Compatible with the following:

MITSUBISHI

- LANCER Evo.7,8,9/CT9A
- LANCER Evo.10/CZ4A

SUBARU

- IMPREZA/GDB(E,F,G)
- IMPREZA/GRB

Straight form coil height adjust type

Real Sports Damper Gravel for compact cars

Straight form coil height adjust
Multi-level (32 level) damping force adjustments
Rear Genuine Form coil spring
Stroke optimized for gravel rallies and off-road trials

SWIFT SPORTS / for ZC31S

Compatible with the following:

TOYOTA

- Vitz RS/NCP91, NCP131

SUZUKI

- SWIFT SPORTS/ZC31S, ZC32S

Real Sports Damper Gravel is a basic shock absorber that makes it easy to enjoy participating in gravel motorsports like rallies and off-road trials. The optimal configuration and damping force characteristics designed specifically for each vehicle type assure stability even on rough road surfaces. Combine with the separately sold KYB Competition Spring for an even wider range of optimal settings.

Reservoir Tank Equipment

RSD Gravel (for Lancer, Impreza) comes equipped with a reservoir tank for the damping force you need from start to finish and for exceptional durability on rough roads and in long distance competitions.

4-level adjustment dial

RSD Gravel models have twin-tube configurations and are equipped with 4-level adjustment dials that make it easy to change settings.

KYB Competition Spring KCS

Straight Form and Genuine Form
The tensile strength (2000N/mm) of this material results in a spring that's both lighter in weight and that offers improved permanent set resistance. Processed to prevent buckling, this spring has a spring rate set in 1 kgf/mm increments.

Pillow Upper Mount

(Fixed type for compact cars)
Use the pillow ball on a mount that connects the shock absorber to the car body for better road feel and high-level competition driving.

Helper Spring Seat

Use between the Main Spring and Helper Spring to expand the range of possible settings.

Helper Spring

Even at high spring rate settings, the Helper Spring ensures the rebound side and improves tire road handling.

Dial Attachment

Mount the dial attachment on the 32-level adjustment dial for smooth and at a touch feel of the dial clicks. Lets you make adjustments easily with your fingertips in vehicles where the adjustment unit is hard to reach.

Control Wire

Mount the Control Wire on the Real Sports Damper ZR/TR/GR and Extage series 32-level damper adjustment models for comfortable adjustments in vehicles in which the adjustment unit is hard to reach or where adjustments can't be made without removing the interior trim.

■ KYB COMPETITION SPRING ■

The driving feel of KCS is in a word 'Supple'.

In an actual vehicle test of the springs in the KCS series, the difference between each spring rate was evaluated as easy to understand.

KCS will be your effective tool to get good result in any category of motor sports.

· The linear flow characteristics make it is easy to understand the road conditions

· A precise spring rate that can accurately adjust the car's behavior

(Spring rate tolerance within $\pm 3\%$)

· High controllability born from suppleness
